PROFILE

Hands-on Technical Project Manager and senior full-stack engineer with 16+ years of building products for clients in Germany, the UK, Denmark, Thailand and India. Core in PHP (Symfony, Laravel) and Python with AWS and DevOps; currently focused on applied AI — LLM agents, RAG, OCR and prompt engineering in production. I lead a 10–13 person team while staying ~80% hands-on, and I contribute to the Symfony framework.

16+	2M	2,000+	OSS
years building and shipping web products	user visits served at peak on a microservice platform	agents & distributors on an ERP built from scratch	listed contributor to the Symfony framework

EXPERIENCE

Technical Project Manager · Nexuslink Services Pvt Ltd
Dec 2025 – Present

- Built Linkyfy, an AI-driven LinkedIn outreach SaaS, from an empty repository to production in two months — now serving 150+ customers.
- Delivered KiViP-Concierge, an AI agent service where models do the work and a human concierge reviews it, end-to-end including DevOps.
- Own client communication, estimation and delivery planning, splitting time roughly 20% team leadership and 80% engineering.

AI agents · LLMs · Python · Laravel · MySQL · AWS · DevOps

Senior Software Engineer · StableLogic Ltd (London) for TEO International (Denmark)
Jun 2024 – Dec 2025

- Built the AlphaTheta (Pioneer DJ) ERP, CRM and customer repair portal from scratch, now used by 2,000+ agents and distributors across Europe, Asia and the USA.
- Delivered a booking platform for EasyStorage (part of easyGroup) that increased orders and became a profitable channel.
- Contributed AI features and new modules to Veroxos, StableLogic's enterprise telecom and asset-management product.

Symfony · Laravel · AI · Java · AWS · PostgreSQL · MySQL · Redis · DevOps

Lead Software Engineer · Simform Solutions
Jun 2021 – Jun 2024

- Developed microservices in Symfony and Node.js for a product serving ~800 customers and up to 2 million user visits at peak time.
- Built an ERP system from scratch and took it live within six months; around 500 distinct user roles now run their operations on it across regions.
- Shaped long-term architecture with clients, translating business goals into technical roadmaps.

Symfony · Laravel · Node.js · MySQL · AWS · Python · DevOps

Software Developer (Team Lead) · Galitein Technologies
May 2019 – May 2021

- Built microservice-based government platforms engineered to absorb heavy traffic peaks during events and festival seasons.
- Automated event-ticket sales across TicketUtils and StubHub with scraping and data pipelines that ran reliably without manual work.
- Owned server infrastructure and system architecture while coordinating developers and designers.

Symfony · PostgreSQL · Python · Node.js · Scraping · DevOps

AI FOCUS

- AI agents & workflow automation
- RAG pipelines
- Prompt engineering
- LLM training & fine-tuning
- OCR & document extraction

Shipped in production: Linkyfy (AI outreach SaaS), KiViP-Concierge (AI agents with human review) and Veroxos (enterprise AI copilot).

BACKEND

Symfony · Laravel · PHP (core, CodeIgniter, Zend, OpenCart) · Python (FastAPI, Flask) · Node.js (Express, NestJS) · Java (Spring Boot)

FRONTEND

JavaScript · React · Next.js · jQuery & AJAX · Tailwind CSS & Bootstrap

DATA & MESSAGING

MySQL · PostgreSQL · Redis · RabbitMQ · MongoDB & NoSQL · Elasticsearch

EXPERIENCE CONTINUED

Backend Developer · GYDE
Aug 2017 – Jul 2019

- Built an ad-serving platform running in 1,000 taxis for 2,500 users and handling about 1 million requests per day.
- Reached the product's business goals within 1.5 years, generating solid customer revenue.
- Designed the system architecture and ran the server infrastructure; spent a month on-site in Bangkok to shape the roadmap.

Laravel · MySQL · Redis · RabbitMQ · AWS · REST APIs · DevOps

Technical Team Lead · AppDev Technolabs
Apr 2017 – Jul 2017

- Assigned work, unblocked developers and built complex modules for client web projects.
- Delivered backend APIs for mobile apps and handled backend deployment and app-store publishing.

PHP · Laravel · MySQL · Mobile APIs

Software Developer (Team Lead) · Galitein Technologies
Aug 2014 – Mar 2017

- Built dongK, a German e-commerce shop with live ticking prices, on AWS.
- Developed modules for hannover.de, the official portal of the City and Region of Hannover, on eZ Platform (Symfony) with a large database.
- Travelled to Germany for project and leadership meetings with teams from multiple countries.

Symfony · eZ Platform · MySQL · AWS · Node.js · RabbitMQ · Redis · Behat · PHPUnit

Software Developer (Team Lead) · Netclues Pvt Ltd
Feb 2010 – Jul 2014

- Ran a large Cayman Islands real-estate database powering 50+ real-estate websites for different companies.
- Built in-house products that cut third-party server and email-marketing costs by up to 30%.
- Delivered domain and hosting services built on WHMCS, plus R&D on complex project modules.

PHP · CodeIgniter · WHMCS · MySQL · JavaScript · DevOps

SELECTED PROJECTS

Linkyfy
linkyfy.ai
An AI-driven LinkedIn outreach SaaS I took from an empty repository to 150+ customers in two months.

KiViP-Concierge
kivip-concierge.com
An AI agent service for busy professionals: hand off the task, AI does the work, and a human concierge checks it before delivery.

AlphaTheta CRM & Repair Portal
repair.pioneerdj.com/customer/claim
An ERP/CRM and customer repair-claim portal for Pioneer DJ, built from scratch and used by 2,000+ agents and distributors on three continents.

EasyStorage Booking Platform
easystorage.com
A booking platform for easyGroup's UK self-storage brand that increased orders and became a profitable channel.

Veroxos
veroxos.com
AI features and new modules for an enterprise platform that manages telecom spend, mobile fleets and device lifecycles.

dongK
dongk.shop
A German online shop with live ticking prices — buyers watch the price move and buy, or let a bot buy at their target price.

hannover.de
hannover.de
Module development for the official portal of the City and Region of Hannover, built on eZ Platform (Symfony) with a large database.

CLOUD & DEVOPS

AWS (Lambda, EC2, RDS, DocumentDB, S3, CloudFront, SQS, SNS, SES, API Gateway, Route 53, CloudWatch, CloudSearch, ELB)
Docker
CI/CD pipelines
Nginx, Apache & Ubuntu server setup
DNS, domains & security hardening
Varnish, cron & Supervisor

APIS & INTEGRATIONS

REST APIs & Swagger / OpenAPI
Payment gateways
Social & third-party APIs
GraphQL
WHMCS, CRM & email-marketing systems

QUALITY & DELIVERY

PHPUnit (TDD) & Behat (BDD)
Code review & architecture
Git (GitHub, GitLab, Bitbucket)
Jira & Confluence
Team leadership & client handling
